

Cutting Diagram for Dipper Box

Based on one 8'x4' (2440x1220) sheet of 12mm plywood. Makes 16 boxes as shown with 40mm cutting wastage (2.5mm per cut) for each sheet, and 10mm (2mm per cut) for each box. Treat boxes externally with water-based preservative, and cover roof with layer of DPC. Roof-mounted (fixing hole marked), but can be back-mounted, in which case reduce length of roof to 290mm and length of base to 200mm, and increase length of back to 220mm.
